Operations Officer, FBIS

BBC Moscow Frequency Usage Chart

1. Receipt is acknowledged of the chart of frequency usage in the Moscow Home Service prepared by the BBC and forwarded by London Bureau on 30 June. A transmittal note to London Bureau bears the signature of Mr. Bowman, implying that the SLS probably prepared the chart. It will be appreciated if our appreciation is expressed to Mr. Bowman, as well as the hope that the source will be able to supply similar charts of this type in the future since they are of considerable usefulness to us and some of our customers.

2. Since this chart represents an improved method of reporting a class of information which has been solicited of BBC by both FBIS and USIA for some time without very satisfactory results, it might help us along substantially, and perhaps also give the SLS a boost, if our high regard for this innovation is communicated to Campbell or other appropriate staff members at an opportune moment. Any move which can be made to encourage further production of this type by the BBC is encouraged.
